

AAQSOLS

Software Development & Dedicated Engineering Teams

Rawalpindi, Pakistan | info@aaqsols.com | +92 304 0200070 | www.aaqsols.com

ABOUT US

AAQSOLS is a Pakistan-based software development company focused on FinTech, banking integrations, and enterprise .NET applications. Our team of 10 engineers includes backend developers, full-stack developers, QA, DevOps, and project management.

We have production experience building digital wallet platforms and payment APIs that handle 100,000+ daily transactions with 30+ bank and third-party integrations.

SERVICES

- FinTech & Payment Systems - wallets, gateways, RAAST/IBFT, KYC, transaction processing
- .NET Core Development - APIs, microservices, admin portals, legacy modernization
- Third-Party Integrations - SOAP/REST with banks, telcos, identity providers, SMS gateways
- Dedicated Development Teams - full squad on monthly retainer
- Staff Augmentation - senior .NET developers embedded in your team

TECHNOLOGY STACK

C#, .NET Core, ASP.NET MVC, React.js, SQL Server, Microservices, Clean Architecture, CQRS, REST, SOAP, Microsoft Azure, Azure Functions, CI/CD, Agile/Scrum

KEY METRICS

- Team Size: 10 engineers (dev, QA, DevOps, PM)
- Platform Scale: 587 REST endpoints, 67 API controllers, 4 deployable microservices
- Integrations: 30+ bank and third-party APIs (SOAP & REST)
- Transaction Volume: 100,000+ daily / 3 million+ monthly (production fintech)
- Payment Flows: RAAST, IBFT, QR, bill pay, telco, cards, wallet transfers
- Database: 86+ stored procedures, performance-tuned SQL Server

ENGAGEMENT MODELS

- Fixed-Price Project - defined scope, milestone delivery, 30-50% upfront
- Dedicated Team - monthly retainer, team assigned exclusively to your product
- Staff Augmentation - per developer per month, works your hours and tools

WHY AAQSOLS

- Production FinTech experience - live wallet and payment systems, not demo apps
- Full team, not one freelancer - PM, QA, DevOps, and multiple developers included
- Pakistan value, international quality - competitive rates with UAE/UK/US timezone overlap
- Technical leadership - founder is Lead Software Engineer with 8 years in .NET and banking

LEADERSHIP

Qasim Khan - Founder & Lead Software Engineer

8 years in .NET, microservices, and FinTech. Previously Lead Software Engineer at Zindigi (digital wallet platform) and senior developer on wallet/banking integrations. Expert in Clean Architecture, CQRS, SOAP/REST bank integrations, and high-volume SQL Server systems.
